PROFESSIONAL EXPERIENCE

Front End Developer	Apprication Pvt Ltd	Mar 2024 - Present
Project: Quickvee - Ecommerce Web App		Tech Stack: React.js, Redux Toolkit, Tailwind CSS, MUI
<ul style="list-style-type: none">Engineered and enhanced core e-commerce modules including Loyalty Exempt, Max Purchase Quantity, and Order Management, improving checkout accuracy and operational efficiency.Designed and implemented 8 discount types - product, category, order-level, BOGO, mix & match deals, coupons, loyalty exemptions, and store credits, enabling dynamic and flexible promotional workflows.Solved complex tax and discount calculation logic, ensuring accurate billing and rounding precision ("penny fix") across diverse order scenarios.Improved error handling and app resilience, leading to 99% up time and fewer failed transactions during high-traffic periods.		
Front End Developer	Neel Networks	Dec 2022 - Feb 2024
Project: In-house Project Management System		Tech Stack: React.js, Redux Toolkit, Tailwind CSS, MUI
<ul style="list-style-type: none">Led the development of an in-house Project Management System that allowed managers to create projects, assign them to teams or employees, and track progress through real-time task updates and employee time logs.Built a role-based dashboard for admins and managers to view employees' daily task summaries, while implementing a personal to-do list feature for employees to manage their own work priorities.Developed interactive forms and task update modules enabling employees to log daily progress, improving transparency and reducing communication gaps across teams.		
Project: Client Invoice Management System		Tech Stack: React.js, Redux Toolkit, Tailwind CSS, MUI
<ul style="list-style-type: none">Built a client billing and tracking system allowing managers to create projects, assign tasks, and log employee work hours tied to client projects.Implemented automatic invoice generation based on employee work hours, with editable billing options for managers to adjust rates or hours before calculating VAT and other taxes.Integrated a "Send Invoice" feature, enabling admins to email finalised invoices to clients directly with a single click.Mentored two new team members, providing KT sessions, code reviews, and guidance on writing reusable, maintainable code.		
Ecommerce Executive	Computronics Multivision Pvt Ltd	Oct 2020 - Nov 2022
<ul style="list-style-type: none">Managed product listings, order processing, and inventory for laptops, printers, and accessories across the company's ecommerce website as well as on Amazon, Flipkart, and Paytm marketplaces.Collaborated with the web team to plan and implement UI design improvements on the WordPress-based store, enhancing product visibility and site navigation.Developed a practical understanding of ecommerce workflows and operations, experience later applied while building frontend features in projects like Quickvee.		

PERSONAL PROJECTS

Loot Bazaar (Ecommerce Web App)	Live Link - Code	Tech Stack: React JS, Redux Toolkit, Mockbee API
<ul style="list-style-type: none">Built core e-commerce features like Cart, Wishlist, and Order Summary, ensuring seamless state management and responsive UI.Designed a modular and reusable component structure, improving code scalability and maintainability across pages.		
Bazaar News (Social Media Web App)	Live Link - Code	Tech Stack: React JS, Redux Toolkit, Mockbee API
<ul style="list-style-type: none">Implemented post creation, following, and bookmarking features with seamless data flow and real-time UI updates.Developed a personalized user feed system displaying posts from followed users, enhancing engagement and interactivity.
